<p>12. APPETITE AND EATING:</p> <p>Has {S} lost or gained weight, or had a change in the food he or she likes?</p>	<p>12a. <input type="checkbox"/> <input type="checkbox"/></p>	<p>12b. <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p>

INSTRUCTIONS FOR THE NEUROPSYCHIATRIC INVENTORY QUESTIONNAIRE (NPI) FORM

I. General Instructions

The Neuropsychiatric Inventory Questionnaire (NPI-Q) is an informant-based interview that assesses neuropsychiatric symptoms of the participant over the previous month. This should be administered, either in person or over the phone, immediately following the CDR Informant interview. Initial response to each question are “Yes” (present) or “No” (absent). If the response to the question is "No", the interviewer goes to the next question. If "Yes", then ask the informant to rate the Severity of the symptoms present within the last month on a 3-point scale (1=mild, 2=moderate, 3=severe).

Read: **“Now I will ask you questions about your husband/ wife/ brother/ sister/ parent/ friend's behavior and personality.”**

II. Detailed Instructions for Each Item

0a. Enter the date on which the participant was seen in the clinic.

0b. Enter the staff ID for the person who completed this form.

1-12. Choose “Yes” only if the symptom(s) has been present in the last month. Otherwise, choose “No”. For each item marked “Yes” rate the SEVERITY of the symptom (how it affects the participant):

1 = **Mild** (noticeable, but not a significant change)

2 = **Moderate** (significant, but not a dramatic change)

3 = **Severe** (very marked or prominent; a dramatic change)
